| Team ID       | SWTID-2026-2605                                |
| Project Name  | Import Data using Transform Maps (Spreadsheet) |
| Maximum Marks | 4 Marks                                        |

## Project Overview:

**Project Name:** Import Data using Transform Maps (Spreadsheet)

**Project Description:** Bulk employee data received in Excel format is loaded into a ServiceNow Import Set table, mapped with a Transform Map into the custom table Employee Test, de-duplicated using Coalesce on Employee ID, and reported through three reports on the Employee Analytics Dashboard.

**Project Version:** 1.0

**Testing Period:** 19 January 2026 to 31 January 2026

## Testing Scope:

Features: spreadsheet preparation, custom table and form fields, Load Data into import set, Transform Map and field mapping, transform execution, Coalesce (insert / update / ignore), reports (Pie, Bar, List) and dashboard sharing.

User stories: USN-1 to USN-15 from the Project Planning Template (Sprint-1 and Sprint-2).

## Testing Environment:

**URL/Location:** [Enter your ServiceNow instance URL]

**Credentials (if required):** Admin user of the ServiceNow instance [username only – do not write the password here]

## Test Cases:

| Test Case ID | Test Scenario              | Test Steps                                                                                                       | Expected Result                            | Actual Result                                   | Pass/Fail |
|--------------|----------------------------|------------------------------------------------------------------------------------------------------------------|--------------------------------------------|-------------------------------------------------|-----------|
| TC-001       | Prepare sample spreadsheet | 1. Create Google Spreadsheet with 15 employee rows<br>2. Download as Sample Spreadsheet.xlsx                     | File downloaded with 5 columns and 15 rows | Sample Spreadsheet.xlsx downloaded with 15 rows | Pass      |
| TC-002       | Create custom table        | 1. Tables > Create New<br>2. Label: Employee Test, Name: u_employee_test<br>3. Submit                            | Table u_employee_test is created           | Table created with Employee Test module         | Pass      |
| TC-003       | Add form fields            | 1. Configure > Form Layout<br>2. Add Employee ID, Employee Name, Email, Department, Location (String)<br>3. Save | 5 fields shown on Employee Test form       | All 5 fields visible on the form                | Pass      |

| Test Case ID | Test Scenario                   | Test Steps                                                                                                                       | Expected Result                                     | Actual Result                                          | Pass/Fail |
|--------------|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|--------------------------------------------------------|-----------|
| TC-004       | Load data into import set       | 1. System Import Sets > Load Data<br>2. Create table Employee Import<br>3. Choose file, Sheet 1, Header row 1, Submit            | Staging table u_employee_import filled with 15 rows | Complete / Success; Processed 15, inserts 15, errors 0 | Pass      |
| TC-005       | Create transform map            | 1. Click Create Transform Map<br>2. Target: Employee Test<br>3. Auto Map Matching Fields / Mapping Assist, Save                  | 5 field maps created                                | 5 Field Maps (Coalesce false)                          | Pass      |
| TC-006       | Run transform                   | 1. Open transform map > Transform<br>2. Select import set and click Transform                                                    | 15 records created in Employee Test                 | Transformation complete, Success; 15 records           | Pass      |
| TC-007       | Coalesce update                 | 1. Set Coalesce true on Employee ID<br>2. Import sheet with changed name and email<br>3. Run Transform                           | Matching records updated                            | 2 updates (SB-0004 name, SB-0010 email)                | Pass      |
| TC-008       | Insert new records              | 1. Include 2 new Employee IDs<br>2. Run Transform                                                                                | 2 new records inserted                              | 2 inserts (SB-0016, SB-0017)                           | Pass      |
| TC-009       | Duplicate check                 | 1. Import the same sheet again<br>2. Run Transform<br>3. Open Transform History                                                  | No new records; rows ignored                        | 0 inserts, 0 updates, 4 ignored                        | Pass      |
| TC-010       | Report: Employees by Department | 1. Reports > New<br>2. Table Employee Test, Pie, Group by Department, Count<br>3. Run, Save                                      | Pie chart by department                             | ServiceNow 11, Salesforce 4, AIML 2                    | Pass      |
| TC-011       | Report: Employees by Location   | 1. New report, Bar chart<br>2. Group by Location, Count<br>3. Run, Save                                                          | Bar chart by location                               | Hyderabad 16, Chennai 1                                | Pass      |
| TC-012       | Report: Employee List           | 1. New report, type List<br>2. Select 5 columns<br>3. Run, Save                                                                  | List with all employee records                      | 17 records, 5 columns                                  | Pass      |
| TC-013       | Create dashboard                | 1. pa_dashboards create ACL: Admin overrides = true<br>2. Open PA_DASHBOARDS.FORM<br>3. Name: Employee Analytics Dashboard, Save | Dashboard record created                            | Dashboard created after enabling Admin overrides       | Pass      |

| Test Case ID | Test Scenario         | Test Steps                                                                                                          | Expected Result                                 | Actual Result                                             | Pass/Fail |
|--------------|-----------------------|---------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|-----------------------------------------------------------|-----------|
| TC-014       | Add reports and share | 1. Open report > Share > Add to Dashboard<br>2. Select dashboard, Add (repeat for 3 reports)<br>3. Open Share panel | 3 reports on dashboard; share options available | 3 widgets shown; Groups / Users / Roles sharing available | Pass      |

### Bug Tracking:

| Bug ID | Bug Description                                                                                                                | Steps to reproduce                                                                                                | Severity | Status | Additional feedback                                                                     |
|--------|--------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|----------|--------|-----------------------------------------------------------------------------------------|
| BG-001 | Department value typed as "Servicenow" (lower-case n) in the updated rows SB-0004 and SB-0010, so it differs from "ServiceNow" | 1. Open the updated Excel sheet<br>2. Import and transform<br>3. Compare Department values in Employee Tests list | Low      | Open   | Correct the casing in the source sheet and re-import; coalesce will update the records. |
| BG-002 | Create Dashboard form not opening through PA_DASHBOARDS.FORM                                                                   | 1. Search PA_DASHBOARDS.FORM in All menu<br>2. Form does not open                                                 | Medium   | Closed | Fixed by setting Admin overrides = true on the pa_dashboards create ACL.                |

### Sign-off:

**Tester Name:** [Enter tester name]

**Date:** 31 January 2026

**Signature:** [Tester's Signature]

### Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
