

Functional & Performance Testing Template

Model Performance Test

Team ID	SWTID-2026-2605
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	10 Marks

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Data Load (Load Data)	Open Load Data, choose Sample Spreadsheet.xlsx, Sheet 1, Header row 1 and click Submit	Import set table u_employee_import is created and all 15 rows are loaded	State Complete, Completion code Success; Processed: 15, inserts 15, errors 0	Pass
FT-02	Field Mapping	Create Transform Map Sample Spreadsheet Import; run Auto Map Matching Fields / Mapping Assist	All 5 source fields mapped to target fields	5 Field Maps created (u_name → u_employee_name, ID, department, location, email)	Pass
FT-03	Transform Execution	Open the map, click Transform, select the import set and click Transform	Records created in Employee Test table	Transformation complete, Success; 15 of 15 records visible in Employee Test	Pass
FT-04	Coalesce – Update Existing	Set Coalesce = true on Employee ID; import sheet with changed name (SB-0004) and email (SB-0010)	Existing records updated, no duplicates	2 updates: SB-0004 = Ajay, SB-0010 email = test18@gmail.com	Pass
FT-05	Coalesce – Insert New	Include two new Employee IDs in the imported sheet and transform	New IDs inserted as new records	2 inserts: SB-0016 and SB-0017 (table now has 17 records)	Pass
FT-06	Duplicate Prevention	Re-import the same sheet and run the transform again	No inserts or updates; rows ignored	Total 4, Inserts 0, Updates 0, Ignored 4, Errors 0	Pass
FT-07	Report Output	Run Employees by Department (Pie), Employees by Location (Bar) and Employee List (List)	Charts and list match table data	Pie: ServiceNow 11 / Salesforce 4 / AIML 2; Bar: Hyderabad 16 / Chennai 1; List: 17 rows	Pass

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-08	Dashboard	Add the 3 reports to Employee Analytics Dashboard and open it	All 3 reports display on the dashboard	Dashboard shows List, Bar and Pie widgets; share options available	Pass
PT-01	Import Response Time	Note the processing time in the Load Data progress message	Small file loads in under 3 seconds	15 rows loaded in about 1.4 s (0:00:01.368); 4 rows in 0.04 s	Pass
PT-02	Transform Speed	Open Transform History and check Run time	Transform finishes within a few seconds	Run time 1 second for 4 rows; 0 seconds for the re-run	Pass
PT-03	Repeated Import Stability	Run three consecutive imports (15, 4 and 4 rows) into the same staging table	No errors or crashes across repeated loads	3 imports completed with 0 errors	Pass
