

Project Development Phase Model Performance Test

Team ID	SWTID-2026-2605
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	10 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	Model Summary	ServiceNow data-import automation using Import Set table Employee Import (u_employee_import), Transform Map Sample Spreadsheet Import and target table Employee Test (u_employee_test) with 5 String fields. Note: Records are created only when the source data matches the mapped fields; otherwise the Import Log / Transform History shows errors.	
2.	Data Rendered	Source: Sample Spreadsheet.xlsx (Sheet 1, Header row 1) with columns Employee ID, Name, Email, Department, Location. Initial load: 15 rows processed, 15 inserts, 0 errors. After the second import the table holds 17 records.	
3.	Data Preprocessing (Field Mapping)	Transform Map: Sample Spreadsheet Import (Employee Import → Employee Test), created with Auto Map Matching Fields / Mapping Assist. Field Maps (5): u_name → u_employee_name, u_employee_id → u_employee_id, u_department → u_department, u_location → u_location, u_email → u_email.	
4.	Utilization of Filters (Coalesce)	Coalesce = true on Employee ID (u_employee_id) to match existing records and prevent duplicates. Rule: matching ID → record updated; new ID → record inserted; identical data → row ignored.	

S.No.	Parameter	Values	Screenshot
5.	Import Accuracy	Import 1 (15 rows): Inserts 15, Updates 0, Errors 0. Import 2 (4 rows): Inserts 2, Updates 2, Errors 0. Import 3 (same 4 rows): Inserts 0, Updates 0, Ignored 4, Errors 0. Import accuracy: 100% (0 errors in 3 imports).	
6.	Result Validation	17 records in Employee Test after imports. SB-0004 name changed to Ajay, SB-0010 email changed to test18@gmail.com, new IDs SB-0016 and SB-0017 added.	
7.	Report Design	No of Visualizations / Graphs - 3 Employees by Department (Pie, Count): ServiceNow 11, Salesforce 4, AIML 2. Employees by Location (Bar, Count): Hyderabad 16, Chennai 1. Employee List Report (List): 5 columns, 17 rows.	
8.	Dashboard Design	No of Visualizations / Graphs - 3 Dashboard: Employee Analytics Dashboard containing all three reports; can be shared with users, groups and roles.
